

Blake Shelton's Tattoo Nightmare

[Voice](#) BFFs [Adam Levine](#) and [Blake Shelton](#) sat down with [Oprah Winfrey](#) to discuss the show and their love of tattoos. Or well, in Shelton's case, his tattoo nightmare. When Shelton went to get inked for the first time, he thought what better than to represent his Oklahoma country roots than with some deer tracks around his forearm. So, what's the catch? Well, the tattoo artist did not know how to draw deer tracks so Shelton drew them himself. A few hours later and voila, Shelton has deer tracks, or as some like to say, ladybugs inked around his forearm. After years of jokes, Shelton added barbed wire around the deer tracks, creating a more masculine look. No matter what he does to make his tattoo more manly, the deer tracks will forever be seen as little ladybugs in societies' eyes.
